Circular Technologies Quality Products for Almost 40 Years

Servicing the US OEM's needs for decades

Circular Technologies started as a division of the Belting Industries back in the year 1973. However early in 1990 Circular Technologies became a separate entity and entered the international market. Circular Technologies has many years of expertise in their production and thus able to offer unique designs and product efficiencies to their customers. With a globally recognized client base, Circular Technologies have proven their consistency in strict adherence to quality and customer responsiveness.

With the client base, Circular Technologies works with volume run with any of their orders exceeding 10,000 pieces a month. As Circular Technologies forge through its outsourcing era it has remained competitive enough to achieve double digit growth annually. Due to many years in production, Circular Technologies are able to handle large production and quickly switch to small runs, Circular Technologies engineers designed a large percentage of Circular Technologies manufacturing process and they are proud to showcase it to visitors.

The Circular Technologies secret to success is offering customized engineering together with customized sales support to their clients. Circular Technologies take time in understanding the client's application and the difficulty associated with the use of power transmission or urethane components. They will do their best to ensure that they answer the client's question and offer recommendations where needed.

Circular Technologies are fanatical about quality. Circular Technologies serve markets ranging from 3D processing, medical imaging to currency processing. Circular Technologies have tolerance for error. Circular Technologies understand the critical to function nature acceptability and that the products sometimes must be spot on. Circular Technologies make it their job to control consistent result of their manufacturing process.

Circular Technologies focus on attention and precision does not end at the final inspection of their products. Circular Technologies takes great care in the safe transport of your orders. Whether it be pulley tubing, flats & boxes, or tray packaging, we use right fit protective, yet economical packaging to ship your product.
